CAPUT III.

Adferuntur observationes notatu dignissimæ.

1. Substantivo uni addas alterum, sed tale, ut priùs debeat poni in Genitivo, juxta Regulam: Quotiescunque, v. g. habes in carmine, cælum, aut polus; vel terra, vel mare, vel ventus; &c. Addas illis unum substantivum, v. g. regia cæli; sidera, tecta, regna, cæli, aut poli, domus olympi, siderum domus &c. Item dic: munera, vel gramina, vel viscera terræ: vel soli, aut: telluris opes, &c. dic: flumina, marmora, æquora, procellæ ponti, aut maris, dic: flamina, furor, flabra, murmura venti, &c. utrique vel uni addas Epithetum, & carmen quodcunque facilè erit confectum: pro exemplo sit hæc materia.

Quæ suis offert sceleratus orbis,

Eodem modo ex eadem materia, mutatis ferè solùm Epithetis, versus alii formari possunt.

2. Si materia desit, addi potest substantivo aliquod adjectivum, vel participium, regens aliquem casum: tum illi casui novum adde Epithetum, si necesse sit; & Carmen in promptu erit, v. g. Sit faciendum carmen ex hac materia: Venit laurea; adde Epithetum regens casum, v. g. digna: huic adde casum v. g. comis, capillis, viro, &c. huic iterum adde Epithetum, & materiam sufficientem habebis. Vel adde participium regens casum, v. g. laurea constans, vel parta cruore, sanguine, labore, &c. tum dices:

Victoriosæ laurea dexteræ,
Condigna venit; dignus cum Genit. juxta observ. præpositam.
Vel:
Venit honoratis laurea digna comis. *Ovid.* Vel:
Venit honoratis, generoso parta cruore,
Laurea, digna comis. Si velis totum Distichon, repetitionem in Pentametro adhibe juxta observationem. 4. Cap. 2. & habebis:

Venit honoratis, generoso parta cruore,
Laurea digna comis, laurea digna viro.

3. Similiter attende ad adjuncta, v. g. quis, quid, ubi; quibus auxiliis, quomodo, &c. quando materia sufficiens carmini struendo deest: tum adjuncta illa, vel unum, vel duo, vel plura, prout necessitas, exigit, interpone, v. g. sit faciendum Hexametrum ex hac materia: ubi hæc sum locutus. Quæras ex te; quibus auxiliis sum locutus; & statim occurret tibi: ore, linguâ, &c.

Deinde quæras: quomodo sum locutus? & dices, modestè, timidè, audacter, &c. hæc adverbia muta, si necesse sit, vel in adjectivum, ut: timido ore, modestâ linguâ, vel in substantivum; v. g. cum timore; huic addere potes adjectivum aliud, v. g. magno cum timore; Ulteriùs quærere poteris: quid sum locutus; & dices: sermones, voces, verba, &c. tum interroga, quæ & qualia verba sum locutus, & dices: multa, pauca, honesta, &c.

Præterea quære: quis est locutus? & dices; ego timidus, audax, tristis, lætus, &c. omitto adjuncta alia. Ex his facilè hæc carmina construes.

Hæc

Hæc ubi sum timidus tardo verba ore locutus,
Hos ubi sum lento sermones ore locutus,
Hæc ego dum dixi cum magno verba timore,
Hæc ubi sum furtim linguâ titubante locutus.

CAPUT IV.

Observationes circa Versus in specie, ac Primò circa Carmen Elegiacum.

1. ORdinariè post quodvis Distichon finitur sententia; Hoc tamen non est adeò necessarium, quin aliquando terminari possit in duplici puncto, ut sæpius fecit Ovidius.

2. Repititio ejusdem literæ frequens in initio vitari debet:

O Tite tute, Tati! tibi tanta tyranne tulisti.

Neque probatur istud Ovidii in Metam.

Corpora Cecrobidum pennis pendere putares.

Pendebant pennis. Et hoc in omni alio Versu observari debet.

3. Verba similiter desinentia, simul juncta, vitari etiam debent; contra quod peccavit Cicero, dum cecinit:

O fortunatam! natam, me consule, Romam.

Similiter vitanda est repetitio ejusdem literæ in fine: propterea non placet illud Propertii:

Et galea hirsutâ compta lupina juba.

Necillud Virgilii in Coppa.

Sertáque purpureâ lutea mixta rosâ.

Multò minùs probatur carmen Leoninum, aliis fortè intermixtum. Ovidius tamen aliquos versus leoninos suis Elegiis immiscuit. Tale est istud:

Vir, precor, uxori, frater miserere sorori.

Ep.8. Et istud. L.3. Fast.

Quærebant flavos per nemus omne favos.

Item sequentia:

Quot cælum stellas, tot habet Roma puellas.
Ipse ego librorum video delicta meorum;
Nec nisi finitâ per plurima vulnera vitâ,
Si mihi quid prodest, hoc tibi, lector! obest.
Si Trojæ fatis aliquid restare putatis,

In Heroico tamen carmine hi versus locum non habent, quia videntur indigni heroicâ gravitate, nisi quis ex professo mera

pangat Hexametra leonina. Virgilius unum hoc Leoninum in Cyri habet, quod deinde repetivit.

Magna Giganteis ornantur pepla tropheis.

4. Hexametrum malè finitur monoſyllabo (ſi ipſum non abſorbeat ſyllabam præcedentem) vel quadriſyllabo; aut duobus monoſyllabis. Habet quidem Virg. plura carmina his vocabulis terminata, nimirum:

Sternitur exanimiſque tremens procumbit humi bos.
Lib. 5. *Æneid.*
Procubuit, viridique in litore conſpicitur ſus.
Lib. 8. *Ænead.*
-- Inſequitur cumulo præruptus aquæ mons.
L. 1. *Æneid.*
Grajus homo infectos linquens profugus Hymeneos.
L. 10. *Æneid.*
Nunc te marmoreum pro tempore fecimus, at tu.
Id. Eccl. 7.

Verùm Tyrones hæc non imitentur. Neque hic audiendi ſunt illi, qui conantur nequidquam dare præcepta, quando Hexametrum terminari monoſyllabo poſſit.

Si tamen monoſyllabum in fine abſorbeat præcedentem ſyllabam, terminari carmen monoſyllabo poteſt, ut dictum eſt, ut:

Inde toro pater Æneas ſic orſus ab alto eſt. *Virg. Lib.* 1. *Æneid.*

Et ſi duo monoſyllaba non faciant cacophoniam, ut faciunt at tu, & me. &c. terminari etiam iiſdem poteſt: unde non improbatur illud Horatii:

Principibus placuiſſe viris non ultima laus eſt.

Terminari itaque Hexametrum decet, vel diſſyllabo, vel triſyllabo; vel etiam aliquando monoſyllabo, ſi ipſum præcedentem ſyllabam abſorbeat, tum etiam duobus Monoſyllabis, ut dictum eſt, ſed cautè.

5. Pentametrum non bene finitur in a. v. g.

Hæc loquor; aut famâ ſollicitata novã. *Ovid. Ep.* 18.

Nec bene finitur in monoſyllabo; unde vitioſum eſt hoc carmen:

-- Hæc à te dictaque, factáque ſunt. *Catul.*

Idem intellige de Semipede primo Pentametri, unde non placet illud Tibullii:

O Dii! reddite mî pro pietate meâ.

Si tamen Monoſyllabum illud præcedentem ſyllabam abſorbeat, nullum erit vitium.

Nec mora; me miſeram? filia clamat; ubi es; *Ovid.* 4. *Faſt.*

Et

Et Ep. 15.

In qua tu nata es, terra beata mihi est.

Et alibi sæpius. Similiter nullum erit vitium, si monosyllabum illud præcedat aliud monosyllabum, ut:

Præmia si studio consequar ista, sat est. *Ovid.*

Nec bene finitur Pentametrum trisyllabo, ut fecit *Ovid.* Ep. 14.

Quæ tamen externis danda forem generis.

Bene tamen quadrisyllabo, aut Pentasyllabo; si ipsum non fiat sæpius: ut:

Unda simul miserum, vitáque deseruit. *Ovid. Ep.* 18.

Et Ep. 16.

Nec sedeo duris torva superciliis.

Sed tirones idipsum caveant.

Pentametrum ergo terminari debet dissyllabo vel monosyllabo priorem syllabam absorbente, vel duplici monosyllabo. Tirones, quantum fieri potest, terminent illud dissyllabo tantùm.

6. Pentametrum non bene finitur nomine adjectivo. Excipe pronomina possessiva: meus, tuus, suus, quibus frequentissimè finitur, ut:

--Ite manus ad pia sacra meæ. *Ovid. L.* 5. *Trist.*

Edicti verbis nominor ipse tui. *Id. ibid. Eleg.* 3.

Implerent venti si mea vela sui. *Ibid.*

7. Hexametrum & Pentametrum est optimum, si cæsuras habeant; sive, si pedes inter se connexi, quasi catena, cohæreant, ut:

Semper honos, noménque tuum, laudésque manebunt. *Virg.*

Vulgus amicitias utilitate probat. *Ovid.*

Contra illud pessimum est, quod vel nullam, vel unam tantùm cæsuram habet, tale est illud Horatii:

Præter cætera Romæ méne poëmata censes
Scribere.

Non tamen necesse est, ut in singulis digitis sit cæsura, nam in primo & quarto, tam in Hexametro quàm Pentametro. Item in quinto digito Hexametri vocabulum sinè absurditate terminari potest. ut:

Affuit Alecto brevibus torquata colubris *Ovid. Ep.* 2.
Linquor & ancillis excipienda cado.
Sed neque consului, nec te mea regia tangit. *Ovid. Ibid.*
Et cecinit mœstum devia carmen avis. *Ibid.*

Præterea vitari debet, ne Hexametrum & Pentametrum

Penthemimeri careant; sive ne vocabulum in secundo pede finiatur; aliàs carmen fiet parum suave; tale est illud Horatii:

Nonquivis videt immodulata poëmata judex.

Nisi illud dissyllabum sit Pyrrichius ? & ipsum sequantur duo vocabula, quorum alterum sit Choreus, alterum Jambus, ut:

At lacrymas sine fine dedi, rupíque capillos.

Ovid.Ep.3.

Sciendum etiam est, quòd prae caeteris caesuris Trochaica semper reddat Hexametrum suave, v.g.

Excutiens cervice toros. &c. *Virg.L.12.Æneid.*

8. In Pentametro vocabulum debet terminari in tertio digito: aliàs insuave fiet carmen. Tale est illud:

Inque sinus afflicti fluit imber aquae,

Praeterea semipes ille non debet esse monosyllbum, ut dictum est.observ.5. in hoc cap. sed debet esse syllaba, ex priore vocabulo relicta, ut:

Quaecunque ex merito spes venit; aequa venit.

9. Verba nimis longa, quae Pendasyllaba excedunt, exesse ex carmine Hexametro & Pentametro debent, admittit tamen Hexametrum in quarto digito incipiens Hexasyllabum, ut:

Sed fugit interea, fugit irreparabile tempus. *Virg. L. 3. Georg.*

Falleret indeprensus, & irremeabilis error, *Idem L. 1. Æneid.*

Et L. 2. Æneid. habet: ineluctabile tempus.

L. 6. Æneid. habet: inextricabilis error.

L. 2. Georg. habet: inexorabile fatum.

L. 8. Æneid. habet: ineluctabile fatum.

Simile verbum in primo digito posuit Statius:

Bellerephontaeas indignaretur habenas. *Virg. L. 5.* habet inexaturabile, Heptasyllabum dum canit:

Junonis gravis ira, & inexaturabile pectus.

Utrumque tamen carmen, tam Hexametrum, quàm Pentametrum admittit saepe Pentasyllabum, ut:

Incustoditae diripiuntur opes. *Ovid.*

Ingeniosus amor, desidiosus &c. Idem.

10. Inter adjectivum & substantivum eleganter aliquid interponitur, ut:

.. duro crepitant sub vulnere malae *Virg. L. 5. Æneid.*

Non ego deserto jacuissem squallida recto;

Nec quererer tardos ire relicta dies. *Ovid. Ep. 1.*

Saepe

Sæpe illud fieri non poteſt, præſertim in Pentametro. v. g.

Ante meos oculos pervigil anguis erat. Idem Ep. 12.

Unde Tirones ſe hic non affligant.

11. Similiter elegantius eſt, ſi adjectivum anteponatur ſubſtantivo, ut:

Nec mihi quærenti ſpatioſam fallere noctem;
Laſſaret viduas pendula tela manus. Ovid. Ep. 1.

Neque hoc fieri ſemper poteſt: unde nec hîc Tirones ſe affligant.

Tam Hexametrum, quàm Pentametrum fit ſuaviùs, ſi à Dactylo incipiat, ut:

Arma virùmque cano &c. Virg. l. 1. Æneid.

Argolici redière duces, altaria fumant;
Ponitur ad patrios bfrbara præda Deos. Ovid. Ep. 1. Item:
Ille meos oculos comprimat, ille tuos. Id. ibid.

Non tamen ullo modo reprobandi ſunt verſus, qui à Spondeo incipiunt; ſæpe enim à Dactylo incipere non poſſunt; neque ſemper à Dactilo incipere debent: tum quia materia Spondeum exigit; tum ut varietas habeatur, ſi carmen ſit longum.

13. Crebræ eliſiones in omni carmine vitari debent; unde perquam hiulcum eſt hoc diſtichon, conſtans ſeptemdecim eliſionibus:

Tu ille ipſe es, quem ego amo intimo amore: iterum & me adama oro.
At te ego anhelo; inde hæc ſunt metra hiulca adeò.

Et illud Pentametrum Catulli:

Quàm modò qui me unum, atque unicum amicum habuit:

Item illud Pentametrum in Epigrammate aliquo antiquo:

Te umbra petam; ergo unquam ne metue, abs te abeam.

Imò ſunt, teſte Balbino; qui in carmine nullas volunt adhiberi eliſiones: verùm hi audiendi non ſunt; nam non omnis eliſio ſemper vitari poteſt, neque vitari ſemper debet materiâ aliquando eliſionem exigente. Adde, quòd eliſiones cum ſale adhibitæ, carmen Heroicum mirùm quantùm exornent. Tirones tamen, quantùm poſſunt, ab eliſionibus caveant, ſemper enim fluxum carminis, ad quem præcipuè hi attendere debent, quique in carmine Elegiaco, Jambicis & Trochaicis, omnibúſque aliis materiam teneram habentibus, maximè naturalis eſſe debet, impediunt, præſertim ſi vocalis à ſimili vocali, v. g. à aba, ut fit in hoc verſu, Virg. L. 1. Æneid.

Omnes cælicolas omnes *ſupra alta* tenentes. Et in iſto:

Primus in arma rue, & clypeum cape.

Litera *m* tutò elidi poteſt ab omnibus; cum enim ſit conſonans

nans, non colliditur durè cum sequenti vocali; neque multum impedit fluxum, ut.

Per tunicam *squalentem auro*, latus haurit apertum.
Virg. L. 10. Æneid.

Ergo hominum *quæsitum odium* mihi carmine &c. Ovid.

Præsertim si *m* elidatur, ut videatur corripi syllaba, quam terminat, more aliarum consonantium, ut:

---*Clamorem* ad sidera tollant. Virg. L. 10. Æn.
Tum lecti juvenes *certatim araque* Sacerdos, &c. Id. L. 8. Æn.
Et famam extingui Veterum &c, Id. L. 6. Æn.

Advertendum hic etiam, quod elisiones mitigentur, si sequens vocalis, aut Diphthongus cum præcedente elisa, in pedem, sive digitum antecedentem conveniat, ut:

Ora manúsque ambas &c. folióque invitat acerno.
Obstupuêre animis &c.

Si elisa vocalis aut diphthongus trahatur ad pedem sequentem, durior fit versus, ut patet ex his exemplis:

Poscit equos *atque arma* simul
---pelagi petere alta parabat.
Solve metus, atque hoc precibus sine posse parentem
---Ergo maria invia Teucris.

Vitanda autem præ cæteris est elisio in initio carminis, si ipsum à monosyllabo incipiat, ut:

Nam ut ferulâ cædes meritum majora subire. Horat.

Et apud Catullum:

Nam unus unguentum dabo. Et apud eundem:

Qui ipse fui &c.

Vitanda similiter elisio est in ultimo pede Hexametri & Pentametri, unde reprehenditur ab aliis hic versus horatii:

Et illud Ovidii:

Quadrijugos cernes sæpe resistere equos.

Hæc tamen elisio Ovidiana est perquam apta materiæ; Tironibus interim cavenda etiam.

CAPUT V.

Quædam observanda circa Carmen Heroicum.

PRæter ea, quæ ex observatis C. præcedente, huic carmini communia sunt, observa:

1. Quòd Carmen heroicum finiri singulis versibus non debeat, sed ad tres, vel quatuor versus trahi possit, ut:

arma,

Arma, virúmque cano; Trojæ qui primus ab oris
Italiam, fato profugus, Lavináque venit
Litora: multùm ille & terris jactatus, & alto
Vi superùm, sævæ memorem Junonis ob iram.
Virg. L. 1. Æneid.

Neque necesse est, ut sententia finiatur in fine versûs, sed vel in initio, vel in medio versus sequentis finiri potest, ut:

Vix ea fatus erat, geminæ cum forte columbæ
Ipsa sub ora viri, cœlo venêre volantes;
Et viridi sedêre solo. *Virg. L. 6. Æneid.*

2. Pedes materiæ sunt aptandi (hæc observatio extendatur etiam ad alios verûss, qui similibus pedibus constant) si enim in hac sit mora, & colluctatio; aut difficultas exprimenda, si vehemens affectus; si tempus, si celeritas exponenda, Dactyli adbeantur: ut ingeniosè fecit Virgilius, nam expressurus vehementem desiderii affectum. Ita cecinit:

Ducite ab urbe domum mea carmina, ducite Daphnim.

Expressurus cursum equorum; L. 8. Æneid. ita:

Quadrupedante putrem sonitu quatit ungula campum.

De Ludis certantium. L. Æn. 5. ità.

Inde ubi clara dedit sonitum tuba, finibus omnes
Haud mora prosiluêre suis: ferit æthera clamor
Nauticus

Dum fugam describeret L. 12. Æn. ità:

Ni fuga subsidio veniat, fugit ocyor Euro.

De tempore L. 10. Æneid. ità:

Stat sua cuique dies, breve & irreparabile tempus.

At dum luctantes ventos exprimere vellet, Spondeis est usus, utpote pedibus tardioribus, dum ait:

Luctantes ventos, tempestatésque sonoras.

Dum laborantes Fabros. L. 4. Georg. ità:

Illi inter sese multâ vi brachia tollunt.

Dum languorem. L. 1. Georg. ità:

Tum somni dulces, densæque in montibus umbræ.

3. Carmen Heroicum amat verba & Epitheta sonantia, qualia sunt participia in ans, & ens præsertim in obliquo: Item participia passiva præteriti temporis primæ conjugationis, tum etiam futuri temporis tam verbi activi, quàm passivi.

--- Trepidúsque repente resurgit,
Attollentem iras, & cærula colla tumentem. Virg. L. 2. Æneid.
Illum indignanti similem, similémque minanti. L. 8. Æneid.
Bísque triumphatas gentes, &c. Id. L. 3. Georg.

Pontémque indignatus Araxes. L. Æneid.
inspectura domus, venturáque desuper urbi. L. 2. Æneid.

CAPUT VI.

Observanda circa Carmen Horatianum.

1. HOc Carmen, quia gravissimum est, delectatur verbis, & Epithetis gravioribus. Sequentia, & alia apud Horatium invenies,

Intaminatus, Formidolosus, tumultuosus, obliviosus, depræliantes, habitabilis, conciliantibus, operosiores, vitiosiores, decoloravere, &c.

2. Primus versus Horatianus (idem est de secundo) est parum fluidus, *Primò*: si constet initio duobus dissyllabis, ut: *Licet Minax, styx*, &c. Et apud Horat. L. 2. od. 17. Ah! te meæ si, &c.

Secundò: Si in tertio digito sit monosyllabum; ut: Nil interest, an pauper &c. Horat. L. 2. od. 3.

Tertiò: Si careat Penthemimeri; hoc est: si ex tertio digito ejiciatur syllaba prioris vocabuli in quartum digitum, hoc modo:

Licet minax *orcus*, fera prælia, &c.

Et apud Horatium L. 1. Od. 37.

Mentémque lymphatam Mareotico, &c.

Nisi illa syllaba absorbeatur à vocali sequenti, ut:

Quem si puellarum insereres choro. Horat. L. 2. Od. 5.

Eheu! cicatricum, & sceleris pudet Horat. L. 1 Od. 37.

Tu lene tormentum ingenio admoves. Id. L. 3. Od. 21.

Hoc tamen non imitentur Tirones, ut fluxui Carminis consulant.

Quartò, Si ex sequenti vocabulo mutuò accipiatur syllaba, pro semipede in tertio digito, ut fecit Horatius, L. 1. Od. 37.

Ante hac nefas de promere Cæcubum,

Pars posterior potest habere cæsuram, ut:

Justum & tenacem *propositi virum*. &c.

Vel potest illa carere, ut:

Dixi Sacramentum: Ibimus, ibimus.

Non tamen habeat in fine monosyllabum, ut:

Ne fortè credas interitura, quæ &c. Horat. L. 4. Od. 9.

Nisi ipsum à vocali incipiat, & præcedentem syllabam absorbeat. Initium ergo Versùs Horatiani his, aut similibus constet vocabulis. Intaminatus. Non indecorus. Qualis minister.

Vides,

Vides ut altum. Dissolve frigus. Dii me tuentur. Et musa cordi est. Horatius.

Finis his aut similibus constet.

Conciliantibus. Nec muliebriter. Æquor Atlanticum: Exitio gravi. Hunc fidibus novis. Quidquid habes age, Filia pulchrior, dives & aureis. In mare Creticum. Nil sine te mei. Horat.

3. Tertius Versus Horatianus potest carere Triemimeri; hoc est: Verbum potest finiri in primo digito, ùt:

---Et mero
Tinget *pavimentum superbo.* Horat. L. 2. Od. 11.

Sed non debet sequi Dissyllabum; aliàs hiulcum fieret Carmen. Potest item carere Hephthemimeri, sive vocabulum potest finiri in tertio digito, ùt:

Tentabo & arentes arenas.

In fine respicit monosyllabum, unde non multùm valent hi versus:

Tentabo & arentes plagas, quæ &c.
Depone sub laurus mea, nec. &c. Horat. L. 2. od. 7.

Nisi monosyllabum illud elidat præcedentem vocalem. Tertius ergo versus Horatianus has habet lectiones, aut iisdem similes.

Lenite clamorem Sodales. Hæc constructio ex tribus vocabulis est Horatio frequentissima: ac propterea credo, quòd Horatius in tertio digito non posuerit Jambum, ut scilicet fluxui carminis consuleret; cui consultum non esset, si tertio loco poneretur quadrisyllabum, aut trisyllabum, terminata in Jambo, ùt:

Canemus inclyti trophæa
Principis, &c

Huic constructioni æquivalet omnis illa, quæ loco trisyllabi habet dissyllabum cum monosyllabo, ùt:

Cum mente nec turpem senectam, &c.

Ad arma cessantes, ad arma. Quod adeò observavit Horat, ut in hoc versu rarissimè habeat duo dissyllaba; & rarò unum dissyllabum sine monosyllabo. Quare constructio illa est reliquis præferenda, æquivalent eidem sequentes:

Vexant inæquales procellæ. Ab insolenti temperatam. Morem verecundúmque Bacchum. Regúmque matres Barbarorum. Si fra-

ctus illabatur orbis. Deprœliantes nec Cupressi. Non erubescendis adurit. Horat.

Sequentes non probantur.

Gaudes: apricos necte flores. Puer quis ex aula capillis.
Culpante nunc torrentia agros. Horat.

4. Ultimus Versus Horatianus fit valdè suavis, si sequentibus modis construatur.

Divitiis potietur hæres.

Hæc conjunctio est Horatio perquàm frequens; uti & sequentes:

Progeniem vitiosiorem. Et foliis viduantur orni. Nec virides metuunt colubros. Unda fretis tulit æstuosis. Digne puer meliore flammâ. Dedecorant bene nata culpæ. Stravit humum sine clade victor. Horat.

Quare & præponendæ sunt sequentibus duabus:

Obstrepit Oceanus Britannis.
Mitte supervacuos honores.

Priore tamen modo aliquoties Strophas claudit Horatius: Sequentes modos non imitentur Tirones:

Jupiter ipse ruens tumultu. Me Cichorea, levésque Malvæ, &c.
Quæ caret ora cruore nostro. Interiore notâ Falerni, &c.

5. In singulis Strophis non finitur necessariò Sententia; sed rejici potest pars illius ad sequentem Stropham, cum elegantiâ. ùt:

Jam pauca aratro jugera regiæ
Moles relinquunt: undique latius
Extenta visentur Lucrino
Stagna lacu, Platanúsque cælebs
Evincet ulmos. Horat.

Non tamen rejicienda est syllaba ex priore Strophâ ad sequentem, uti fecit Horat. Od. 12. L. 2.

Hospitis illa venena Colchi.
ca. Et quidquid usquam &c.

Porrò Tironibus pro exemplo, hæc Stropha Horat. L. 3. Od. facilè cæterarum elegantissima præscribi potest:

Virtus, repulsæ nescia sordidæ,
Intaminatis fulget honoribus;
Nec sumit, aut ponit secures
Arbitrio popularis auræ.

CAPUT

CAPUT VII.

Observatio circa Carmen Jambicum.

1. QUòd Versus Jambici, licet alios pedes, præter Jambos recipiant, non tamen admittunt unquam Trocheum; sicuti nec Trochaici admittunt Jambum

2. Quòd versus Jambici, non Catalectici, qui destinati sunt; materiæ jucundæ, vel rhythmis, sint elegantiores, si careant cæsurâ, ut:

Ave Virgo! Parens Dei
Esto memor rogo mei.

Si tamen in fine ponatur trisyllabum, cæsuram requirunt; propterea suavior est hic versus Jambicus Archilochius *Balde de van. mundi.*

Fuêre Troês illium.

Quam iste: Fuit, fuit domus inclyta.

Jambici Catalectici cæsuram requirunt; unde suavior est iste Anacreonticus ejusdem Lib. citat.

Montésque fulminantur.

Quam iste Pontes timent araxen.

Quòd si alternatim ponantur versus Catalectici cum Acatalecticis, ut fecit *Balde de van. mundi*, jam Acatalectici non debent terminari dissyllabo; aliàs nullus erit fluxus odarum, quia tum versus Catalecticus; quia penultimam producit, si Acatalecticus terminaretur dissyllabo, jam uterque pari sono, & cadentia, uti ita loquar, terminaretur, Monosyllabo terminavit Balde Acatalecticos Jambicos semptem; ut:

Alterna mors, Alterna sors,
Alterna fata trudunt.
Item. Deforme jam cadaver est.
Formosa Roma quondam.
Item. Cantantur hæc plorantur hæc,
Scribuntur, & leguntur,
Videntur hæc, ridentur hæc.
Et lecta negliguntur; &c.

Dissyllabo terminavit quatuor: qui propterea non habent parem fluxum cum aliis ut:

Si se videret in Tybri,
Puderet esse visam.
Item Num vel manus, vel pes, tua
Lysippe! sculptus arte,

Reliquos omnes terminavit, vel trisyllabo, vel quadrisyllabo

3. Quòd versus Jambici (idem intellige de Trochaicis, & omnibus illis, qui in materia suavi versantur, aut rhythmis) qui materiam teneram habent, debeant parcere elisionibus, ut dictum est suprà, Balde sex tantùm elisiones habet in suis Jambicis de Van. mundi.

4. Quòd idem versus Jambici, licèt Anapæstos, aut Tribraches admittant, magis fluidi sint, si solis Spondæis, aut Jambis constent; patet hoc ex sequentibus versibus:

Elementa rerum dissident.
Idem, Jugulat Falerna Sardonyx.
Et. Ululatus aulicorum. *Balde.*

5. Quòd senarium Jambicum delectetur verbis, & Epithetis longis, & gravibus; est etiam carmen gravissimum. *Audiatur. Seneca.*

Dii conjugales! *túque* genialis tori
Lucina custos, In Med. Act. 1. Et:
——*Pelle* fœmineos *metus.*
Et inhospitalem Caucasum *mente indue. ibid.*

Neque in singulis versibus finitur sententia necessariò, sed eleganter protrahi potest per plures versus, & in medio finiri; ùt:

Quis me per auras turbo præcipitem vehet,
Atráque nube involvet, ut tantum nefas
Eripiat oculis; Sen. in Thyest. Act. 4.

6. Quòd Senarium Jambicum (idem dic de Dimetro, si versetur in materia gravi) delectetur cæsuris, patet hoc cuivis Senecam legenti, ùt:

Si steterit animus, si metu corpus rigens
Remittit artus, hæret in vultu trucis
Imago facti ferte me insanæ procul,
Illò procellæ, ferte, quò fertur dies.
Hinc raptus. Sen. in Thyest. Act. 4.

In quinto digito eleganter terminatur verbum, ùt:
Fortuna opes auferre, non animum potes. Sen. in Med. Act. 3.

Item:
Dii conjugales, tùque genialis tori
Lucina custos, quæque domitorem freti,
Tiphyn novam frenare docuisti ratem;
Et tu profundi sæve dominator maris &c.

7. Quòd senarium Jambicum optimè terminetur dissyllabo (vel Monosyllabo etiam, si priorem syllabam absorbeat) raro Quadrisyllabo, aut Trisyllabo. Excipe, quando Trisyllabum elidit præcedentem syllabam; tunc enim cum elegantia, & gravitate

vitate carmen terminat, fecítque hoc Seneca frequenter. In monosyllabo, absorbente præcedentem syllabam, terminavit illud in Med. Act. 5.

——Causa fugiendi nova est. Et Act. 5.

Pars ultionis ista, quâ gaudes, *quota est*. Et alibi; sed rariùs. In monosyllabo, non absorbente præcedentem syllabam. Ibid. Act. 4.

Cælo petam venena; jam nunc tempus est,

In quadrisyllabo:

Committe habenas genitor, & flagrantibus, &c.

Med. Act. 1.

Revocabo in altâ conditam caligine, ibid.

In Pentasyllabo.

Ut dura cautes undique intractabilis.

In Hippol. act. 2.

In Trisyllabo, absorbente priorem syllabam.

Quid anime cessas; sequere felicem impetum. In Hippol. act. & alibi frequentissimè.

In Trisyllabo, non absorbente præcedentem syllabam, terminavit carmen in Med. act. 2.

Si quod Pelasgæ, si quod urbes barbaræ, &c.

Et alibi non adeò frequenter.

CAPUT VIII.

Observanda quædam circa Versus Anapæsticos, & Trochaicos. Observa.

1. Quòd Versus Anapæstici sint optimi, si nullam habeant cæsuram, & singuli pedes singulis vocabulis terminentur, ùt:

Tertia misit buccina signum,
Nondum seræ nuncius horæ Sen. in Thyest.

2. Quòd similiter Versus Trochaici, ut fluidi sint, carere cæsurâ debeant, ùt:

Eja Musa! sume plectrum,
Tange chordas, pange versus.

Versus tamen Sapphicus cæsuram requirit, ùt

Integer vitæ, scelerisque purus.

3. Quòd Versus Trochaici, qui potissimum materiis jucundis destinati sunt, carere elisionibus debeant, ùt:

Crux fidelis inter omnes
Arbor una nobilis;
Silva talem nulla profert,
Fronde, flore, germine.

CAPUT IX.

De Epithetis.

EPithetorum magna in Carmine vis eſt, ut loquitur P. Maſenius in palæſtra Eloquentiæ L. 2. cap. 8. ſive ad varietatem, ornatum, & copiam, ſive ad deprimendam, extollendámve pro rei dignitate orationem; vis enim Metaphoram? dic cum Virgilio: Pontem indignatus Araxes? improba rabies, cæcus furor, livor edax &c. vis Metonymiam? dic: Cerealia dona, munera Bacchica, triſtis ſenectus &c. vis Hyperbolen? dic: pernicius Euro, ferrea vox, turris emula cælo &c. Vis quantitatem ob oculis ponere? dic: vaſti fluctus, immenſum mare, immanis dolor &c. vis qualitatem? dic: dulcia mella, veſtis candida, labra tenera &c. vis patriam, & locum exprimere? dic: Lariſſæus Achilles, Venus Cypria, Hircana Tigris, Marſus Aper, vinum Maſſicum. &c. vis ſimilitudinem? dic: collum eburneum, dentes nivei, labra roſea &c. adeò ut Epithetorum inveniendi facultas (verba ſunt ejuſdem Maſenii) Poëtam propemodum faciat, & ſterilitas aſperantem excludat. Quam ob rem factum eſt, ut aliqui juventuti plurima præcepta obtruſerint de Epithetis aptis inveniendis; ſed quia hi in ſolis præceptis ſteterunt, juventutem parum adjuvarunt: dic enim Adoleſcenti: pone in verſu iſto Dactylum Metaphoricum, aut Metonymicum &c. quomodo illum inveniet Tiro Diſcipulus, cùm in ipſo inveniendo laboret non raró Magiſter Poëta? At ſi Adoleſcenti Dactylos plures ob oculos ponas, eidémque dicas, ut ex illis aliquem materiæ præſenti, quam prius intelligat, aptum ſeligat: ſtatim eundem inveniet, niſi fungus ſit. Alii Adoleſcentibus (verba ſunt ejuſdem) libros Epithetorum ſufficiunt, unde ad complendos verſus idonea hauriant vocabula; at modum non oſtendunt, quomodo juventus apta Epitheta ſeligere poſſit, Errare hos dicit idem Author, & bene; nam rudis juventus, nullis adjuta præceptis, ſine diſcrimine quodlibet obvium arripiet vocabulum, ad hiatum carminis complendum maximè opportunum; parum ſollicita, quâ illud ſignificandi gratiâ uſurpetur. Ut duplici huic defectui ſubveniatur, primò hic ponam ordine aliqua ex ſingulis generibus Epitheta (omiſſis Participiis,) ut juvare ſe iis. Tirones poſſint. Deinde ſubjungam præcepta aliqua de uſu Epithetorum. Ordine præcedunt.

CAPUT X.
De Usu Epithetorum.

SUnt qui plura tradunt præcepta de Epithetis aptis seligendis; Ego, quæ circa usum præceptorum observavi paucis indicabo. Itaque.

OBSERVA 1. Quod uni substantivo tantùm debeat addi unum Epithetum.

Excipe. 1. Nisi illud Substantivum repetatur; tunc enim, sicut cum illo Adjectivum priùs repeti potest, ut: *Nuncia leta mihi, Nuncia læta tibi*; ita etiam novum Adjectivum ei addi potest, ut: *Nuncia læta mihi, Nuncia mœsta mihi.*

Excipe. 2. Nisi intercedat aliqua Conjunctio inter illa Adjectiva, v. g. Et, Vel, Nec, &c. ut:

Quique priùs mollem, vacuamque laboribus egi
In Studiis vitam. *Ovid.* 5. *Trist. Eleg.* 4.
Horrendum, & dictu video mirabile monstrum.
Virg. 3. *Æneid.*
Ille asper & improbus irâ. 9. *Æneid.*

Hæc Conjunctio sæpe omittitur, ut:

Monstrum horrendum, informe, ingens. *Id. ibid.*

Excipe. 3. Participia cujusvis temporis; hæc enim eidem Substantivo cum alio adjectivo adjungi possunt, ut:

-- Subjectísque ignibus atris. *Virg.* 11. *Æneid.*
Ut pia formosis addita thura rogis. *Ovid. Ep.* 7.
--- Latéque patentia duxi
Mœnia, finitimis invidiosa solis. *Ovid. Ep.* 7.
Mœsto flagrante tumultu. *Virg.* 11. *Æneid.*

Observa secundò, quòd Epithetum non debeat esse otiosum; sed debeat aliquid saltem clariùs exprimere, quod ipsum Substantivum se solo non exprimit. Porrò Epithetum non tantùm potest exprimere aliquid substantivo suo conveniens, v. g. Turpis egestas; Tristis senectus, Amor ingeniosus, &c. sed

ſed etiam aliquid conveniens rei alteri, cum qua ipſum Subſtantivum eſt connexum. Itâ Ovid. Ep. 1. canit.

Nec mihi quærenti ſpatioſam fallere noctem,
Laſſares viduas pendula tela manus.

Ubi dicit, viduas manus, pro: manibus viduæ uxoris.
Item:

Attenuant vigiles corpus miſerabile curæ,
hoc eſt: curæ hominis vigilis.

Et Virg.

Memorem Junonis ob iram, pro: ob iram Junonis memoris.

Obſerva 3. Quod Epitheta, quæ Tropum aliquem involvunt, præ cæteris ſint ſeligenda; hæc enim & Poëtis ſunt frequentiſſima, præſertim Metonymica, & reliquis elegantiora: itâ horatius cinerem vocat doloſum, glaciem inertem, ornos viduatas, &c. per Metaphoram. Item Maſſicum vocat oblivioſum, ſicut Ovidius vocat ſidera frigida, & Martialis favillas triſtes, per Metonymiam.

Obſerva 4. Quòd Epithetum debeat ſemper materiæ præſenti eſſe accommodum; unde quæſiturus Epithetum, bene intelligat materiam, de qua agit; nam Epithetum, quod in alia materia eſt perquam accommodum, in præſenti ſæpe eſt ineptum, & otioſum: imò poteſt contingere, ut Epithetum cum Subſtantivo naturaliter conjunctum, in præſenti materia eidem non conveniat, in exemplo: ignis ex natura ſua eſt calidus, & ad comburendum celer; ſi tamen Martyr cum igne expoſtularet, quòd lentè & tenuiter ureret, non deberet illum vocare rapacem & ferventem, ſed lentum & frigidum. Ità nihil velocius eſt tempore; ſi tamen quereretur anima in purgatorio, ſe magnos cruciatus perferre, non deberet tempus, quo patitur, vocare velox, ſed tardum; uti querebatur Penelope apud Ovidium. Ep. quòd viveret tardos dies. Hæc obſervatio eſt inſtar omnium. Interim.

Obſerva 5. Quòd Epitheta in carmine Elegiaco & Heroico debeant eſſe uſitata, & authoritate bonorum Poëtarum probata: in Carmine Lyrico, præſertim Horatiano poſſunt etiam eſſe minùs uſitata, nova & audaciora.

CAPUT XI.

Praxis faciendi quodvis carmen facilè & eleganter.

IN hoc capite manuducam Tirones, & docebo practicè, quomodo præscriptam sibi materiam facilè in carmen elegans cogere possint. Ex quo constabit etiam, quomodo carmen aliud quodcunque facilè & eleganter componi possit. Quòd ut impetrem faciliùs, sequentia monere debeo.

Primò: Ut facturus carmen Observationes omnes suprà de Versibus, tùm in genere, tùm in specie de illis, quos compositurus est, bene perspectas habeat.

Secundò, Ut materiam præscriptam benè intelligat.

Tertiò: ut facilem sibi usum Epithetorum faciat, eáque in promptu habeat, quod fiet, si eadem aliquoties per otium evolvit. Participia quivis formare noverit à verbis, & comparativa, uti & superlativa à positivis.

Quartò: In promptu habeat, quomodo eundem pedem in diversis locis inveniat. v. g. desideras Choriambum; hunc invenies primo inter Pæones primos, non habentes incrementum, ut: instabilis, æthereus, &c. secundò eum invenies inter Dactylos, habentes incrementum breve, ut: degeneres, dedecores, armigeri, &c. Tertiò eundem invenies inter Spondeos aliquos, ut: ancipites, disparibus, supplicibus, &c.

Quintò: Facturus Carmen, habeat in promptu illos Pedes, qui præsenti carmine præcipuè serviunt. Quare facturi Disticha in promptu habeant imprimis Jambos: ex his enim finis & medium Pentametri constat, v. g. ex Adjectivis: bonus, meus, cavus, ferus, &c. Deinde in promptu habeant illa Substantiva, ex quibus finis utriusque carminis facilè haberi potest, qualia sunt nomina Declinationis tertiæ, habentia incrementum breve pro Hexametro, ut: trames, dives, palmes, &c. corpus, crimen, fœdus, formido, munimen, &c. tùm nomina in um, quæ numerum pluralem habent, ut: labrum, flabrum, flagellum, prælium, propugnaculum, &c. Item omnia nomina generis neutri, ut: murmur, nomen, numen, fulgur, tonitru, &c. Ex his enim facilè finis Distichi confici potest, v. g. tramite longo, formidine fractus, divite venâ, &c. murmura ponti, fulmina, murmura sæva maris; fulmina læva poli, flabra Noti, elisa tonitrua cælo, &c. Jam ad praxin pergamus.

§. I.

§. I.

Praxis faciendi carmen Elegiacum

TIrones primò sint solliciti, ut habeant finem Hexametri, & Pentametri: Pentametri finis ordinariè est Jambus, vel Pyrichius, ut: Meus, fuit, poli, &c. ante hunc vel debet esse vocabulum quinque pedum, ut: Diripiuntur opes. Deseruisse juvat, &c. vel sint duo vocabula, quorum primum sit Dactylus, alterum Choreus, ut: Sidera clara poli, scribere jussit amor; vel quorum primum sit Choreus, alterum Amphibrachis, ut: Regina beata poli, vel denique sint tria vocabula, duo scilicet dissyllaba, & unum monosyllabum, ut: Laus tua victa jacet; de grege captus equus.

Finis Hexametri semper est carmen adonium, vel partim abscissum à pede præcedenti. ut: Aurora resurgit, domus omnipotentis olympi, vel non ità abscissum, ut: sidera cæli; unde Tirones doceantur primò facere Versus Adonios & Hemistichia, tum Hexametri, tum Pentametri; idque ex quavis re obvia, licet nullus sit, in iis sensus, & miram postea facilitatem experientur in Distichis pangendis, v. g. ex hoc nomine: cælum, faciant in primis Adonia, v. g. *Sidera cæli, Atria cæli, Regia cæli, Astra polorum, Cælica sedes, &c.* tùm Hemistichia, ut: *Regia beatorum, Divorum Habitacula cælum, Divina palatia cælum, Domus omnipotentis Olympi, &c.* tum faciant Hemistichia Pentametri, ut: *Sidera clara poli, Regna beata poli, Sidereæque domus, Regia magna jovis, Æthereæque faces.* & ità de quavis re obvia. Tùm procedant ad integra carmina concinnanda.

Facturus itaque disticha, distingue materiam in duas partes: unam pro Hexametro, alteram pro Pentametro, & pro Adjectivis, relinque hiatus, postea implendos, v. g. sit Distichum faciendum ex hac materia ex Martiali desumptâ.

Sic pisci indulget hamus; sic esca decipit feras, muta imprimis pisces ex numero singulari in pluralem, & habebis finem Hexametri nimirum: piscibus hamus, tùm materiam Hexametri ita scribe.

Sic ⏑⏑– | –– | indulget piſcibus hamus.

ÆOLI, & ÆOLIÆ DESCRIPTIO.

Nimborum in patriam loca fœta furentibus Austris
Æoliam venit. Hic vasto Rex Æolus antro
Luctantes ventos, tempestatesque sonoras
Imperio premit ac vinclis & carcere frœnat.
Illi indignantes magno cum murmure montis,
Circum claustra fremunt: cella sedet Æolus arce.
Sceptra tenens; mollitque animos & temperat iras:
Ni faciat maria ac terras, cœlumque profundum
Quippe ferant rapidi secum, vertantque per auras.
Sed Pater omnipotens speluncis abdidit atris?
Hoc metuens, molemque & montes insuper altos
Imposuit, Regemque dedit, qui fœdere certo
Et premere & laxas sciret dare jussus habenas. *Virg.* 1. *Ænid.*

DESCRIPTIO ÆTNÆ.

—— Horrificis juxta tonat Ætna ruinis,
Interdumque atram prorumpit ad æthera nubem,
Turbine fumantem piceo & candente favilla,
Attollitque globos flammarum & sidera lambit:
Interdum scopulos avulsaque viscera montis
Erigit eructans liquefactaque saxa sub auras
Cum gemitu glomerat, fundoque exæstuat imo.

Virgil. Æneid. 3.

Alia ejusdem Montis Descriptio, ex Silio. Ital. l. 14.

Ast Ætna eructat tremefactis cautibus ignes,
Inclusi gemitus, pelagique imitata furentem,
Murmure per cœcos tonat irrequieta fragores,
Nocte dieque simul fonte è phlegetontis ut atro
Flammarum exundat torrens: piceâque procellâ
Semiambusta rotat liquefactis saxa cavernis.

qua de causa exerro inter rivales dissidio, Achelous singulari certamine superatus Herculi concedere est coactus. Porro cum Hercules transiturus esset Evenum Ætoliæ fluvium, qui tum temporis maxime excreverat, Nessus Centaurus seipsum obtulit ad transvehendam Deianiram: quā cum Nesto commisisset, ipse prius intrepide tranavit fluvium. Sed cum Nessus qui in altera remanserat ripa novæ nuptæ vim inferre pararet, ægre id ferens Hercules, sagitta hydræ sanguine infecta Centaurum transfixit, qui se moriturum sentiens ut hostem ulcisceretur. Deianiræ vestem proprio suo sanguine perfusam dono dedit, asserunt ei vim amatoriam inesse, & si hac maritus induceretur, ipsum ab aliarum mulierum amore avocatum iri. Mulier itaque nimis credula munus accepit & cum audisset maritū suum in Eubœa amore Ioles Euryti filiæ detineri, vestem Nessi sanguine imbutam Lychæ famulo tradidit, domino suo perferendam. Hercules igitur nihil mali suspicans cum sacrificaturus eam induisset, tantis cruciatibus affectus est, ut in furorem versus, Lycham à Cæneo monte in Euboicum mare dejecerit, qui in scopulum mutatus est. Ipse autem Hercules arcu & sagittis hiloctetæ commissis se in ardentem pyram in Oetâ monte constructa conjecit. Quod Deianira audiens dolore percita. DESCRIPTIO FAMÆ, Virg. 4. Æneid,

——— Magnas it Fama per urbes.
Fama, malum, quo non aliud velocius ullum
Mobilitate viget, viresque acquirit eundo:
Parva metu primo, mox sese attollit in auras,
Ingrediturque solo, & caput inter nubila condit.
Illam Terra parens ira irritata Deorum,
Extremam, ut perhibent Cæo Enceladoque sororem
Progenuit, pedibus celerem, & pernicibus alis.
Monstrum horrendum, ingens, cui quot sunt corpore plumæ,
Tot vigiles oculi subter (mirabile dictu)
Tot linguæ, totidem ora sonant, tot surrigit aures.
*N*octe, volat cœli medio terræque per umbram
Stridens, nec dulci declinat lumina somno.
Luce, sedet custos, aut summi culmine tecti,
Turribus aut altis, aut magnas territat urbes,
Tam ficti, pravique tenax, quàm nuntia veri.
Hæc tum multiplici populos sermone replebat
Gaudens, & pariter facta atque infecta canebat.

Ovid. 3. Metam.

Fons erat illimis, nitidis argenteus undis,
Quem neque pastores, neque pastæ in monte capellæ
Contigerant, aliudve pecus: quem nulla volucris
Nec fera turbaret, nec lapsus ab arbore ramus.
Gramen erat circa, quod proximus humor alebat,
Sylvaque sole locum passura tepescere nullo.

DESCRIPTIO HORTI. *Virg.*

Hortus erat, junctus casulæ, quem vimina pauca,
Et calamo redimita levi munibat arundo:
Exiguus spatio, variis sed fertilis herbis:
Nil illi deerat, quod pauperis exigit usus,
Hic olus hic latè fundentes brachia betæ,
Fœcundusque rumex, malvæque inulæque virebant,
Hic cicer, & capiti nomen debentia cæpe.
Hic etiam nocuum capiti, gelidumque papaver,
Grataque mobilium requies lactuca ciborum.
Et gravis in latum demissa cucurbita ventrem.

DESCRIPTIO INDOLIS PRÆCLARÆ.

En tenero quantus puero vigor en ut ocelli!
Sideribus similes radiant, utque ora genæque.
Quanquam cognosci possit quoque mater in illis,
Plus tamen & patriæ spirant virtutis, & acres
Promittunt animos & dignas sanguine vires.
Ipse genus, generisque sui sentire videtur
Authorem, in primo tantus vigor eminet ortu.
IPsa etiam natura nihil neglexerit in illo.
Solertique manu formatos corporis artus
Magna anima dignum hospitium, sedemque paravit.

DESCRIPTIO INFERNI EX CHRISTIANIS POETIS.

Extremo ſubeunda patet ſpelunca barathro,
Qua non ulla magis regnis demiſſa profundis.
Paſcit in æternas flammarum incendia pœnas,
Sulphureos alit unda lacus, atque ignibus atris
Unda alitùr glaciem juxta, reſonantia juxta
Fluctibus alliſis, vaſtâque voragine ſaxa.
Luctus ibi, planctuſque virûm, gemituſque nocentûm
Verberaque ingeminant, quaſſatque immanè caverna
Horror, & ora dolor redeuntibus obſidet alis:
Hoc immerſi omnes, quicunqne ferocibus auſis
Bella ſacris fecêre, jacentque, dolentque Nerones;
Corpora tercentum rigidis percuſſa catenis.
Perpetuis ardere rogis. clavaque ſonora
Centauros fremere, & ſpiris religantibus Hydras. P. *Alex. Donat.*
Omnia funeſtis operit nox atra tenebris,
 Horridaque offuſum retro agit umbra diem.
Clauditur æratis circum undique & ūndique muris,
 Ferrataſque ligant vincula mille fores.
Obſidet hoſpitium gravis illætabile mœror
 Et ſocia æternus cum legione dolor.
Intus agit picei rogus atra volumina fumi,
 Sulphureamque domus tota Mephitin alit.
Ignea denſatis in aheno carcere flammis
 Regnat, & Ætnæo plus furit aura foco.
Urimur hoc ſemper, ſemperque renaſcimur igni,
 Quoque neceſſe mori eſt, non licet igne mori. P. *Iac. Biderm.*

DESCRIPTIO INVNDATIONIS. Ovid. 10. Metam.

Intremuit, (*terra*) motuque vias patefecit aquarum.
Exspaciata ruunt per apertos flumina campos,
Si qua domus mansit, potuitque resistere tanto
Indejecta malo, culmen tamen altior huius
Unda tegit, pressæque latent sub gurgite turres,
Omnia pontus erant, deerant quoque littora ponto:
Occupat hic collem, cymbâ sedet alter aduncâ.
Et ducit remos illic ubi nuper ararat,
Ille super segetes, aut mersæ culmina villæ
Navigat, hic summâ piscem deprendit in ulmo.
Figitur in viridi, (sic sors tulit) anchora prato,
Et modo, quà graciles gramen carpsêre capellæ,
Nunc ibi deformes ponunt sua corpora Phocæ,
Mirantur sub aquâ lucos, urbesque domósque
Nereides, sylvasque tenent Delphines & altis
Incursant ramis, agitataqua robora pulsant,

DESCRIPTIO DUORUM INTER SE LUCTANTIUM.

Talia dicentem [me] jam dudum lumine torvo.
Spectat, & accensæ non fortiter imparat iræ,
Verbaque tot reddit: melior mihi dextera lingua est,
Dummodo pugnando superem, tu vince loquendo
Congrediturque ferox, puduit modo magna locutum
Cedere rejeci viridem de corpore vestem,
Brachiaque opposui tenuique à pectore varas
In statione manus, & pugnax membra paravi.
Ille cavis hausto spargit me pulvere palmis,
Et modo cervicem, modò crura micantia captat,
Aut captare puros, omnique à parte lacessit.
Me mea defendit gravitas, frustraque petebas:
Haud secus ac moles, quam magno murmure fluctus
Oppugnat, manet illa, suoque est pondere tuta:
Digredimur paulum rursusque ad bella coimus.
Inque gradu stetimus certi non cedere, eratque
Cum pede pes junctus, totoque ego pectore pronus.
Et digitos digitis, & frontem fronte premebam.
Non aliter vidi fortes concurrere tauros. Ovid. 9. Metam.

Circumquaque sonant, turbo versatilis omnes
Vertitur in partes, huc illuc impete toto
Plagarum impatiens agitur, sed verbera plagis
Addit & in varios juvenilis turba rotatus
Torquet oberrantem : crebro sese explicat orbe,
Seque urget, multoque salit contortus ab ictu.
At frustra instabilis partes se, vertit in omnes,
Quò minus inflictos hinc inde movetur ad ictus

Poetæ inter notas divinitatis censent suavem odorem, ut non uno in loco videre est apud Virg. & Ovid. de venere ita canit:

———————— tenues successit in auras,
Mansit odor; posses scire fuisse Deam.

Alcitidius odor reddebat olim homines, contemptibiles, tum quod crederentur illi velle tegere ingratum odorem, tum quod essent homines effeminati, & molles, unde est illud antiquum: bene olet, qui nihil olet. *Et illud Martialis Epigramma.*

DESCRIPTIO PARADISI.

Quæ servire poterit ad describendum locum alium amœnum.

Non humiles istic curæ, non vilis egestas,
Non patit alternas menstrua Luna vices.
Non vitam duræ rapit inclementia mortis.
Non properat celeri curva senecta pede.
Sed nivei sine labe dies ducuntur in ævum,
Ducitur, & dulci flore juventa viret.
Culmina non istic rigidâ vestita pruinâ,
Aut nemorum duris brachia tunsa Notis.
Ast hilaris vernæ patet indulgentia lucis,
Et rubet Assyriis prodiga terra rosis.
Arvaque luxuriant Zephyro fœcunda magistro,
Subdita nec solito mollia prata modo.
Umbrosumque nemus, Platanosque per obvia nexas,
Insilit, & grato carmine mulcet avis.
Sponte sua fruges, & sponte resurgit Amomum,
Pullulat & nardi sponte renata seges.

PESTE CORREPTORUM DESCRIPTIO, Ovid. 1. Met.

Viscera torrentur primo, flammæque latentis
Indicium robur est & ductus anhelitus igni,
Aspera lingua tumet: tepidisque attentia ventis
Ora patent autæque graves gravantur hiatu.
Non stratum, non ulla pati velamina possunt:
Tantaque sunt miseris invisi tædia lecti:
Prosiliunt, aut, si prohibent, consistere vires,
Corpora devolvunt in humum fugiuntque penates
Quisque suos sua cuique domus funesta videtur.
Aspiceres flentes alios, terraque jacentes,
Lassaque versantes supremo lumina motu:
Membraque pendentis tendunt ad limina cœli,
Hic, illic, ubi mors deprenderit exhalantes.

ALIA DESCRIPTIO PESTIS.
Ex Tarquin. Gallat.

En subito violenta lues (mirabile visu]
Agmina corripuit, ferroque minacior acri
Sternit humi juvenes validos, & inertia vulgò
Corpora per campos: aer incanduit æstu,
Afflatusque vetat lenes. undasque salubres,
Cunctaque prævitiant lato contagia morbo,
Cernit pastor oves crudeli strage peremptas,
Audacesque dolet tauros occumbere campo
Inter opus medium, glebisque perire solutis,
Nec minus ad miseros pestis vesana colonos
Venit, & in plenis gliscit vis morbida castris.
Sævit & in reliquos damno graviore maniplos,
Illis ora parent tepidis arentia ventis,
Suffusæque natant nares, & sanguine fauces
Sudant, & fœdo fluit aspera lingua cruore.
Solvuntur tandem latera, & præcordia tussis
Quassat, anhela sitim nonnulla exstinguit aquæ vis:
Sed passim intereunt, animamque in flumine linquunt.

DESCRIPTIO PHILOMELÆ canentis.

————————modo namque æqua'i lis uno
Assurgit tractu gutturque volubile longo
Lubricat impulsu, facilesque expectorat aures,
Difficiles numeros modo colluctata retorquet,
Infuscat, scindit, carpitque ac plurima mutat,
Plurima dum mutat surgit symphonia discors,
Quando poscit hymen liquidos puri aeris haustus
Projicit, absorbetque iterum jaculabile murmur,
At quo intra fauces subigit, tacitumque choreuma
Delibrat donec campo prorumpat aperto,
Una eademq; canit toties distincta, venitque
Obvia sæpè sibi, nonnunquam adversa caditque,
At surgit vocemque premit, vocemque coruscat
Quod si festa Ducis subeant connubia novit,
Novit & ipsa suos ad pompam augere tumultus.
Erigitur sublime ruens, rostroque perorat
Fusius, è rostris credat præsagia dici,
Jamque ut lympha sonat, quæ cursus immemor, arva
Radit & inventos divexat rore lapillos.
Jam majore modo turgens vivemis ad instar
Fluminis Aonidum lapsus imitatur aquarum,
Et sua Pegaseis stipat præcordia bullis, &c.

DESCRIPTIO RHETHORICÆ.

Illa ego ſum mores agreſtum exoſa virorum,
Fingere quæ tectis urbea, atque oppida juſſi
Mœnibus obvallata ſuis, rituque ferarum
Degentes populos concordi pace ligavi.

Illa

Illa ego, quæ fontes gelido de lumine lethi,
Oppressosque opibus procerum, studiisque potentum
Eripio innocuos, vitam miserata labantem
Ita mihi Regum cedit populique frementis,
Seditio posito, cedit Bellona flagello,
Et furor, & versis discordia mobilis armis!
Mecum degit honor, degunt examina laudum,
Me decorant falces, & pacto purpura textu,
Gloriaque & populi plausus comitantur euntem.

P. Tarq. Gallut.

O quis latinæ fons opulentiæ
Exuberanti vividus impetu
Bacchatur, & lymphata secum
Corda rapax animosque volvit.
Qui nunc profundo volvitur alveo
Sententiarum nunc gracili fluit
Torrente linguæ, nunc apertis
Ingenii spatiatur arvis.
Suique latè pronus & insolens
Exire ripam, non tamen uvida
Captivus alga, nec tenaci
Ire piget per aprica limo.

Quàm bene Saturno vivebant Rege, priusquam
 Tellus in longas est patefacta vias.
Nondum cæruleas pinus contempserat Undas,
 Effusum ventis, præbueratque sinum.
Nec vagus ignotis repetens compendia terris
 Presserat externâ Navita merce ratem.
Illo non validus subiit juga tempore Taurus,
 Non domito frenos ore momordit equus.
Non domus ulla fores habuit. Non fixus in agro,
 Qui regeret certis finibus arva lapis.
Ipsæ mella dabant quercus ultróque ferebant,

DESCRIPTIO SERENITATIS POST TEMPESTATEM.

Haud secus ac fœdi terra caligine nimbi
Cum rapuere diem terris, tristique procellâ
Funestum invexere hyemem, post fulgura densis:
Per nubes elisa minis ruptique fragorem.
Ætheris, & duros lapidosæ grandinis imbres,
Terrarumque metus trepidos gemitumque dolentis
Naturæ, faciemque nigrantem horrentis averni;
Sol ubi per tristes rutilum jubar exerit auras,
Protinus illucere dies, vanescere e cœlo
Mœstities, hilari pullum mutare colorem.
Terra, novo candens aër ridere sereno.
Blandaque composito se fundere gaudia mundo,
Sole frui natura.

Aut impulsa levi turbantur glarea venâ
Tunc exhausta super multo sudore juventus
Extrahitur duris silicum lassata metallis;
Quoque minus siccos possent tolerare vapores
Quæsitæ fecistis aqu : manus utraque glebas

Colluvies immota jacet, cadit omnis in haustus
Certatim obscœnos miles moriensque recepit,
Quas nollet victurus aquas: rituque ferarum

SOMNI AULA. Ovid, 11. Metam.

Est prope Cimmerios longo spelunca recessu,
Mons cavus, ignavi domus & penetralia Somni:
Quo unquam radiis oriens, mediisve cadensve
Phœbus adire potest: nebulæ caligine mistæ
Exhalantur humo, dubiæque crepuscula lucis.
Non vigil ales ibi cristati cantibus oris
Evocat Auroram, nec voce silentia rumpunt.
Sollicitive canes, canibusque sagacior anser,
Non fera, non pecudes, non moti flamine rami,
Humanæve sonum reddat convicia linguæ.
Muta quies habitat: saxo tamen exit ab imo,
Rivus aquæ lethes, per quem cum murmure labens
Invitat somnos crepitantibus unda lapillis.

Ante

Ante fores antri fœcunda propavera florent.
Innumeræque herbæ quarum de lacte soporem
Nox legit,& spargit per opacas humida terras.
Janua ne verso stridorem cardine reddat,
Nulla domo tota est. custos in limine nullus.
Ast medio totus est ebeno sublimis in antro,
Plumeus unicolor, pullo velamine tectus,
Quo cubat ipse Deus, membris languore solutis,
Hunc circa passim varias imitantia formas
Somnia vana jacent totidem quot messis aristas,
Sylva gerit frondes, ejectat littus arenas, &c.

DESCRIPTIO SPEI. ex Ovid. 1 de Ponto.

Hæc Dea, cum fugerent sceleratas Numina terras,
 Ex Diis invisâ sola remansit humo
Hæc facit, ut vivat fossor quoque comoede vinctus,
 Liberaque à ferro crura futura putet.
Hæc facit, ut videat cùm terras undique nullas,
 Naufragus in mediis brachia jactet aquis.
Sæpe aliquem solers medicorum cura reliquit,
 Nec spes huic veniâ deficiente cadit.
Carcere dicuntur clausi sperare salutem,
 Atque aliquis pendens in cruce vota facit.
Hæc Dea quàm multos laqueo sua colla ligantes
 Non est propositâ passa perire nece.

DESCRIPTIO TEMPESTATIS

Ovid. 12. Metamorph. Conf. Triſt. El. II.

—— Mare ſub noctem tumidis albeſcere cœpit
Fluctibus, & præceps ſpirare valentius Eurus;
Aſpera creſcit hyems, omnique à parte feroces
Bella gerunt venti, fretaque indignantia miſcent.
Ipſe pavet, nec ſe quis ſit ſtatus ipſe fatetur
Scire ratis rector nec quid jubeatve velitve:
Tanta mali moles, tantoque potentior arte eſt.
Quippe ſonant clamore viri, ſtridore rudentes;
Undarum incurſu gravis unda, tonitribus æther:
Fluctibus erigitur, cœlumque æquare videtur.
Pontus, & inductas aſpergine tangere nubes.
Sæpe dat (*navis*) ingentem fluctu latus icta fragorem;
Jamque labant cunei, ſpoliataque tegmine ceræ
Rima patet, præbetque viam lethalibus undis.
Ecce cadunt largi reſolutis nubibus imbres,
Inque fretum credas totum deſcendere cœlum;
Inque plagas cœli tumefactum aſcendere pontum:
Vela madent nimbis, & cum cœleſtibus undis
Æquoreæ miſcentur aquæ: caret ignibus æther,
Cæcaque nox premitur tenebris hyemiſque, ſuiſque.
Diſcutiunt tamen has, præbentque micantia lumen
Fulmina, fulmineis ardeſcunt ignibus undæ.
Deficit ars animique cedunt, totidemque videntur
Quot veniunt fluctus, ruere atque irrumpere montes,
Non tenet hic lacrymas, ſtupet hic, vocat ille beatos, &c.

COMPARATIO TEMPORIS CUM FLUVIO
Ovid. 15. *Metam.*

Ipsa quoque assiduo labuntur tempora motu,
Non secus ac flumen: neque enim consistere flumen,
Nec levis hora potest, sed ut unda repellitur undâ,
Urgeturque prior veniente, urgetque priorem,
Tempora sic fugiunt pariter, pariterque sequuntur.
Et nova sunt semper: nam quod fuit ante, relictum est,
Fitque quod haud fuerat, momentaque cuncta novantur.

DESCRIPTIO TRIUMPHI.

Ovid Trist 4,

Ergo omnis populus poterit spectare triumphos,
Cumque ducum titulis oppida capta leget:
Vinclaque captivâ Reges cervice gerentes,
Ante coronatos ire videbit equos,
Et cernet vultus aliis pro tempore versos:
Terribiles aliis immemoresque sui
Quorum pars causas & res, & nomina quæret,
Pars referet quamvis noverit illa parum.
Hi lacus, hi Montes, hæc tot Castella, tot Amnes
Plena feræ cædis, plena cruoris erant
Cornibus hic fractis viridi male tectus ab ulva,
Decolor ipse suo sanguine Rhenus erat.
Crinibus en etiam fertur Germania passis,
Et ducis invicti sub pede mœsta sedet
Semper in hoc curru, Cæsar victore vehêris,
Purpureus, populi rite per ora tui, &c.
